

UK Specialists in Solar Water Heating

Filsol are widely recognised as one of the UK's leading experts in solar energy technologies, and have been manufacturing, designing and installing solar water heating collectors and related equipment since 1981.

High Efficiency Solar Collectors

Filsol's highly regarded range of high efficiency flat plate solar collectors is based on a stainless 'selective surface' absorber plate. Extensive industry testing and over 27 years of successful installations are testimony to the proven quality of our collectors in providing highly efficient, robust and reliable service for their design life time and beyond. We are presently developing new solar collectors including a range of different colour options for aesthetic integration into buildings.

UK Manufacturing

We are proud of our position as a leading UK manufacturer of solar

collectors. From our factory in South Wales, our products are manufactured with an emphasis on quality, energy efficiency and low environmental impact. Aside from creating jobs and developing UK engineering capability in the emerging renewable energy sector, we are also able to offer solar collectors with a reduced carbon footprint.

Our Capabilities

Our success is founded on working closely with clients, developers, architects, M&E contractors and design consultants to provide effective solutions and a fully comprehensive service, including:

- Tailored in-house system design and specification
- Flexible supply and project support solutions
- Nationwide network of experienced and accredited installers
- Project management
- Quality management
- Health and safety compliance
- Maintenance and aftercare support
- Grant application advice and support
